

SAP Preparation

1. This is handy for creating shortcut on a user's desktop for any SAP transaction, report or other task that are executed frequently

A. back button

B. Next page button

C. Find button

D. Create shortcut button

2. SAP password rules. Rule 2: there can not be special character as the first character of the password. Examples of special character as ! and ?

A. Verno B neverno

3. WEBAS is....

A. malleable

B. flexible

C. Durable

D. reliable

4. It is used to travel down one screen when the information on the screen is too long to fit on a single screen.

.

a. Back button

b. Enter Button

c. Save button

d. Find button

e. Next Page button

5. SAP password rules. Rule 4 : the first three characters should not be a part of user name

A. Verno

B. neverno

6. You can say that: ECA = Application talking among each other using services on a Four Tier Architecture

A. Верно

B. Неверно

7. What will be price if client order 30 motorcycles?

A. 3099

B. 3999

C. 3899

D. 3499

E. 3333

8. MRP system was developed in the U.S. in the mid-1960s

A. Верно

B. Неверно

9. Database Basics. All enterprise applications like SAP are essentially made up: Choose at least one answer.

a. * programs

b. * manuals

c. * components

d. * data

10. SAP password rules. Rule 1: There should be at least three characters in the password. However, norm is to have between 5 and 8.

A. Верно

B. Неверно

11. What questions are related to MRP II? 1) What need to buy (produce)? 2) What do we need (resources)? 3) In what quantity?

Choose one answer.

a. I and II

b. I only

c. I, II and III

d. I and III

e. II and III

12. LUW is..

Choose one answer.

a. Logical Unification of Work

b. Logical Unit of Work

c. Linear Unification of Work

13. Each client is given a ____ digit unique number. What number (unique client number's size) is missed?

Choose one answer.

a. 6 -bolmaid

b. 3

c. 4 bolmaid

d. 5

e. 8 - bolmaid

14. WebAS full name is..

Choose one answer.

- a. Web Application Service
- b. Web Application Server**
- c. Web Automation Service

15. SAP password rules. Rule 5: The password cannot contain "no-no" strings. Examples are "SAP" and "pass". System Administrator can add more strings to the list.

A. Верно

B. Неверно

16. By default the system allows you to open ____ sessions at any given time.

- a. 5
- b. 10
- c. 4
- d. 6**
- e. 8

17. You enter information in SAP screens also refer to as "dialogs". This information is then transferred to the database. This event is called "dialoging" of data.

A. Верно

B. Неверно

18. In what order you did modules on your SAP labs?

- a. PP, CO, LO**
- b. CO, LO, PP
- c. PP, LO, CO
- d. LO, PP, CO
- e. LO, CO, PP

20. Primary Key. This key individually distinguishes one particular record from all others in the database.

A. Верно

B. Неверно

21. On the SAP R/3 logon screen you can't enter:

- a. port**
- b. your user name
- c. language
- d. the client number
- e. your password

22. It is used to travel up one screen if the information on the screen is too long to fit on a single screen.

a. Previous Page button

b. Back button

c. Save button

d. Enter Button

e. Next Page button

23. What will be price if client orders 80 motorcycles?

a. 3333

b. 3899

c. 3099

d. 3999

e. 3499

24. A client machine could be..

a. individual PC

b. tablet

c. workstation

d. smartphone

e. router

25. It is right for T-code:

Choose at least one answer.

a. A T-code is provided by SAP for nearly every transaction

b. Transaction codes also referred to as T-codes save a considerable amount of time

c. T-codes vary in length. Their length do not exceed 30 characters

d. A transaction code is a shortcut alphanumeric code

e. Most codes have length about six or eight characters

26. What "place of costs" did we create in CO module?

Choose at least one answer.

a. CC-PLA

b. CC-AS

c. CC-MA

d. CC-MAI

e. CC-CA

27. The three-tiered architecture divides the architecture into three layers:

Choose at least one answer.

a. The database layer

b. Application layer

c. The user interface layer

d. The business object layer

e. The presentation layer

28. The fourth layer exists in between the application and presentation tiers.

A. Верно

B. Неверно

29. What questions are related to MRP? 1) What need to buy (produce)? 2) In what time? 3) In what quantity?

Choose one answer.

a. I and II

b. I, II and III

c. II and III

d. I only

e. I and III

30. SAP ECC replaces SAP R/3 as the company's main software system.

A. Верно

B. Неверно

31. Most companies maintain three SAP systems:

Choose at least one answer.

a. One for consultants

b. One for testing

c. One for production use

d. One for new developments

e. One for sellers

a. tough upgrade

b. run out of resouces

c. loosing scalability

d. not replaceable

e. harder administrate

33. Navigation Using the Keyboard. What are right for it?

Choose at least one answer.

a. You can use your keyboard to select menus as well.

b. Press F12 to activate the menu bar.

c. A function is selected by highlighting it with the arrow keys and then by pressing Enter.

d. Use the navigational arrow keys on your keyboard to select menu items.

e. You can use mouse gesters

34. SAP password rules. Rule 5: The password cannot contain "no-no" strings. Examples are "SAP" and "pass". System Administrator can add more strings to the list.

A. Верно

B. Неверно

35. In a client/server environment, a client machine requests information, via network, from the supplying machine, known as the server.

A. Верно

B. Неверно

36. For each SAP R/3 system you want to log in to, you need to enter at minimum... What doesn't need to enter?

a. description

b. URL address

c. SAP System type

d. application server

e. System ID

37. In MRP II systems, more attention is paid to the financial sub-systems

A. Верно

B. Неверно

38. Transaction codes are not case sensitive.

A. Верно

B. Неверно

39. Check Table Violation. The SAP database will accept data in any fields that contain a foreign key to a Check table in which the data entered does not exist in the Check table.

A. Верно

B. Неверно

40. It is used to travel to the end of a screen when the information on the screen is too long to fit on a single screen

a. Find button

b. Enter Button

c. Next Page button

d. Last Page button

e. Back button

41. You can enter VA___ in the command field and then press Enter. This would display existing sales order.

a. VA05

b. VA03

c. VA04

d. VA02

e. VA01

42. Client is an independent organizational unit within the system SAP

A. Верно

B. Неверно

43. Examples of SAP transactions include:

Choose at least one answer.

a. Creating a new customer

b. Executing a program

c. Processing an order

d. Deleting Item

e. Updating client

44. mySAP consists of four solution from functional point of view:

a. mySAP ERP Financials

b. mySAP ERP Operations

c. mySAP ERP Corporate Services

d. mySAP ERP Human Relation

e. mySAP ERP Human Capital Management

45. What are right for creating a New Session?

Choose at least one answer.

a. A new session could be created at any time in SAP

b. Data in the already open session is not lost

c. Basis Consultant can control session limit

d. A new session could be created from nearly any screen

e. You can open above the 6 sessions at one time

46. What number of basic material records you created on PP labs?

Choose one answer.

a. 3

b. 6

c. 5

d. 7

e. 4

47. What org structure has right order?

a. Warehouse - Sector - Factory - Client

b. Warehouse - Balance Unit - Factory - Client

c. Warehouse - Factory - Balance Unit - Client

d. Factory - Warehouse - Balance Unit - Client

e. Balance Unit - Warehouse - Factory - Client

48. The program is created by the data and also used by them

A. Верно

B. Неверно

49. SAP password rules. Rule 3: The first three characters of the password must be unique.

A.Верно

B. Неверно

49. The last two items on the menu bar are:

Choose at least one answer.

a. * Help

b. *About

c. * System

d. *File

e. *Info

50. What is a purpose of MRP II?

Choose one answer.

a. minimize the costs associated with inventory and in different areas of production

b. identification and planning of all resources of the enterprise, which are necessary for sales

c. control the execution plan for the use of production capacities

d. quantification in relation to the time periods in the planning horizon

e. forecasting, planning and production control carried out on the entire life cycle of products

51. What is wrong for sessions?

Choose one answer.

a. You can open more than one session at a time.

b. A user session is begin when you connect to SAP via the SAP GUI (the SAP graphical user interface) user interface.

c. Data in the already open session is not lost

d. A user session is begin when you connect to SAP via the SAP LOGON interface.

e. A session means that you are now connected to the SAP system.

52. What is a purpose of MRP?

Choose one answer.

a. identification and planning of all resources of the enterprise, which are necessary for sales

b. control the execution plan for the use of production capacities

c. forecasting, planning and production control carried out on the entire life cycle of product

d. quantification in relation to the time periods in the planning horizon

e. minimize the costs associated with inventory and in different areas of production

53. WebAS understand most popular computer languages including:

Choose at least one answer.

a. SAP ABAP/4

b. XML

c. C#

d. HTML

e. CSS

54. 

This button is used to perform a search for data on the screen in which you are currently working

Choose one answer.

a. Find button

b. Save button

c. Back button

d. Next Page button

e. Enter Button

55. What does canteen's service cost?

Choose one answer.

a. 50000

b. 80000

c. 90000

d. 150000

e. 60000

56. What is canteen's salary?

a. 150000

b. 80000

- c. 90000
- d. 60000
- e. 50000

57. SAP provides two ways to navigate:

Choose at least one answer.

- a. Using the transaction codes (T-codes)
- b. Using main menu
- c. Using mouse cursor
- d. Using hot keys
- e. Using both menu paths

58. Multiple database servers can exist in an SAP three-tiered design.

A. Верно

B. Неверно

59. SAP has part of CIS market in percentage (2011):

Choose one answer.

- a. >70 bolmaid
- b. >60
- c. >30
- d. >50
- e. >40 -bolmaid

60. MMR1 is code transaction for what?

Choose one answer.

- a. end-product
- b. raw material
- c. fabric product
- d. begin-product
- e. half-stuff

61. Clipboard Selection. Short-Key for *Select?

Choose one answer.

- a. (Ctrl+X)
- b. (Ctrl+C)
- c. (Ctrl+Y)
- d. (Ctrl+V)
- e. (Ctrl+E)

62. What is a conception of ERP II?

Choose one answer.

- a. control the execution plan for the use of production capacities
- b. management of internal resources and external relations company**
- c. identification and planning of all resources of the enterprise, which are necessary for sales
- d. minimize the costs associated with inventory and in different areas of production
- e. forecasting, planning and production control carried out on the entire life cycle of products

63. What is a purpose of ERP?

Choose one answer.

- a. control the execution plan for the use of production capacities
- b. identification and planning of all resources of the enterprise, which are necessary for sales**
- c. minimize the costs associated with inventory and in different areas of production
- d. quantification in relation to the time periods in the planning horizon
- e. forecasting, planning and production control carried out on the entire life cycle of products

64. What is missed? Motorcycle is built from Engine, Engine Block, Frame, ____ .

Answer: CAMSHAFT

65.

What is total number of employee in canteen?

Choose one answer.

- a. 25 -bolmaid
- b. 5**
- c. 15 -bolmaid
- d. 20
- e. 10 -bolmaid

66. You can enter the code FD__ to update a vendor's credit limit

Choose one answer.

- a. FD32**
- b. FD22
- c. FD23
- d. FD24
- e. FD33

67. What will be price if client orders 600 motorcycles?

Choose one answer.

- a. 3999
- b. 3899**

- c. 3499
- d. 3099
- e. 3333

68. The Users Overview screen available via transaction SM04 lists:

Choose at least one answer.

- a. the client number they are logged in to
- b. the transaction code that they are currently running (their first session only)
- c. the usage memory
- d. the number of sessions that they currently have open
- e. the system's version

69. SAP is supported databases are

Choose at least one answer. ?

- a. Microsoft SQL Server
- b. IBM DB2
- c. MySQL MaxDB
- d. Oracle
- e. SAP DB -bolmaid

70.

The command field is located ...

Choose one answer.

- a. in right top corner
- b. in left bottom corner bolmaid
- c. to the right of the Enter button
- d. to the left of the Enter button
- e. in top middle

71. The dispatcher also assures that more than half of logical units of work is completed before the data is committed to the database.

A. Верно

B. Неверно

72. It is used to travel to the top of a screen if the information on the screen is too long to fit on a single screen.

Choose one answer.

- a. Previous Page button
- b. Back button
- c. Enter Button

d. Next Page button

e. First page button

73. The results of individuals companies can be rolled up to a higher level. This roll up is usually performed at..

Choose one answer.

a. quarter end

b. week end

c. day end bolmaid

d. month end

e. year end

74. If you use this button to return to the previous screen, your data will not be saved unless you save it first using the Save button on the toolbar

Choose one answer.

a. Save button

b. Find button

c. Back button

d. Enter Button

e. Next Page button

75. Who can increase session number limit?

Choose one answer.

a. BASIS Consultant

b. System Administrator

c. SD Consultant

d. HR Consultant

e. ABAP programmer

76. SAP. What is right for RDBMS?

Choose at least one answer.

a. SAP CRM have fewer than 10,000 tables.

b. The SAP database contains thousands of tables.

c. SAP ECC and SAP R/3 have more than 3000,000 tables.

d. Each table contains information about some entity.

77. The following components constitute what is known as mySAP Business Suite.

Which one wrong component?

Choose one answer.

a. mySAP

- b. SAP SRM
- c. SAP PLM
- d. SAP SCM
- e. SAP ECC

78. When you connect to SAP the first time around or after your password is initialized, you are forced to..

Choose one answer.

- a. setup your preference
- b. watch help tips
- c. read license agreement
- d. modify password
- e. fill extra personal information

79. What is raw material?

Choose one answer.

- a. Motorcycle -bolmaid
- b. Engine -bolmaid
- c. Engine Block
- d. Frame

80. To create a new session and start a new transaction you need enter:

Choose one answer.

- a. /S
- b. /N
- c. /O
- d. /V
- e. /Z

81. What is minimum number of characters in a transaction code?

Answer: 3

82. The Standard Toolbar contains:

Choose at least one answer.

- a. zooming
- b. navigational
- c. page viewing
- d. printing
- e. help functions

83. What is maximum number of alphanumeric characters in a transaction code?

8

84. The newer version of SAP R/3 is called..

Choose one answer.

a. ECC

b. ESS

c. ECS

85. In order to terminate your SAP session you can: I) Select the System -> Logoff option from the main menu, II) Click on the Windows "X" icon in the top-right corner of SAP window, III) Execute /nex command from the SAP command field. You will be prompted to confirm if you want to shutdown your session. What operations are right?

a. II and III

b. I, II and III

c. I and III

d. I and II

e. I only

86. You can start to do LO module only after...

a. PP, CO b. MM, CO c. SD, MM d. SD, CO e. PP, SD

87. SAP password rules. Rule 4: The first three characters should not be a part of user name

A. Verno

88. . mySAP ERP includes following components, but one is wrong, find it:

Choose one answer.

b. ERP Central Component

c. Business Intelligence -bolmaid

d. Neatweaver –bolmaid

e. Webservice Infrastructure

89. SAP password rules. Normally companies allow their company name to be part of the password as well.

A. verno

B. neverno

90. This button is used to perform an extended search for data on the screen in which you are currently working.

Choose one answer.

- a. Back button
- b. Find Next button**
- c. First page button
- d. Next Page button
- e. Previous Page button

91. What 2 technical card did we create?

Choose at least one answer.

- a. ACC-FRAME
- b. ACC-ENGINE**
- c. ACC-MOTO**
- d. ACC-CAMSHAFT
- e. ACC-BLOCK

92. 1. MMF1 is code transaction for what?

Choose one answer.

- a. half-stuff
- b. finished product**
- c. raw material -bolmaid
- d. begin-product
- e. fabric product

93. 6. In CO Module we calculated «actual manufacturing cost». What was number?

Choose one answer.

- ☐ a. 3246.55 EUR
- ☐ b. 543.55 EUR
- ☒ **c. 1554.55 EUR**
- ☐ d. 1856.55 EUR
- ☐ e. 2367.55 EUR

bolmaid –

94 A transaction is a:

Choose at least one answer.?

- a. a set of steps with a beginning and an end**
- b. results in some kind of output**
- c. results in an update to the underlying database software**
- d. self-contained unit**
- e. sequence of information exchange and related work

95. MMB1 is code transaction for what?

Выберите один ответ.

- ☐ a. end-product bolmaid
- ☒ b. begin-product----- bolmaid
- ☐ c. fabric product ----- bolmaid
- ☐ d. raw material
- ☐ e. half-stuff ?

96. What is right for sessions?

Выберите по крайней мере один ответ:

- a. A new session could be created from nearly any screen.
- b. Data in the already open session can be lost.
- c. A user session is begin when you connect to SAP via the SAP Logon interface.
- d. You can open more than one session at a time.
- e. A new session could be created at any time in SAP.

97. User 1 might log in to particular company, say company 1, to do his work. While User 2 might log into a different company, say company 2. User 1 can see company 2 data. User 2 can see company 1 data.

Neverno
